| | | | | | | C | Brush Cutting | | | | |
| | | | | | | D | Other | | | | |
| Do Not Provide Total Costs | | | | | | | | | | | |

- Notes:**
1. Include separate prices for each subproject. For example, if bidding on Hidden Code Drive Grading, complete the cell for Project # 1A.
 2. Prices must include all costs to complete the work. No additional payment will be made without prior approval.
 3. MOPC reserves the right to award the above projects in its best interests, at its discretion, regardless of pricing.
 4. Contractors may request site meetings to review work. Contractors may not claim additional fees for work not identified in bidding.
 5. Dissemination of site meeting information shall be at MOPC's discretion. Contractors shall be responsible for all clarifications.
 6. Contractor pricing shall remain valid for the 2026-27 fiscal year. If additional work being required, MOPC reserves the right to award work to Contractors in its sole determined best interests.
 7. Calcium may need to be applied twice per season. However, Bidders are to price calcium dust control work based on the cost per single application. All dust control must meet standards found in <https://novascotia.ca/tran/publications/Highway-Maintenance-Standards-Manual.pdf>. Contractors must verify their calcium concentration prior to application.
 8. For Project #12 (On-Call Basis), MOPC seeks to determine unit costing for other sites that do not require regular maintenance. Prospective Bidders are asked to provide pricing per meter based on an equivalent length of road.
